### STATEMENT OF REASONS FOR ALLOWANCE

The prior art cited herein fails to disclose a control device for a hybrid engine comprising a limitation request output unit that, when the driver's requested output is larger than input-available driving force to the input shaft of the automatic transmission, outputs a limitation request to limit the total output to a limitation output, which is smaller than or equal to the input-available driving force, wherein the motor control unit, when the limitation request is output by the limitation request output unit, controls the motor output so that the total output of the motor output and the engine output becomes the limitation output.
